TRAK - PERSONALIZED INVESTMENT ADVISORY SERVICE

"Total Purchases vs. Market Value" is provided to assist you in comparing your "Total Purchases," excluding reinvested distributions, with the current value of the mutual fund positions in your account

"Cumulative Cash Distributions" when shown, may reflect distributions on shares no longer held in the account. It may not reflect all distributions received in cash; due to but not limited to: investments made prior to addition of this information on statements; securities transfers; timing of recent distributions; and certain adjustments made in your account.

"Net Value Increase/ (Decrease)" reflects the difference between your total purchases, and the sum of the current value of the fund's shares, and cash distributions shown. This calculation is for informational purposes only and does not reflect your total unrealized gain or loss nor should it be used for tax purposes.

Certain mutual funds may not be transferable to other broker-dealers. For further information, please refer to the fund's Prospectus or contact us. Global Investment Manager Analysis (GIMA) status codes (FL, AL or NL) may be shown for certain mutual funds. Refer to "GIMA Status in investment Advisory Programs" in the June or December statement (or your first statement, if you have not yet received one in either of those months) for a description of these status codes. Current Yield is the estimated annual income (EAI) divided by the fund's net asset value at the end of the statement period. Distributions may consist of income, capital gains or the returns of capital distributions. EAI is based upon information provided by an outside vendor and is not verified by us.

Although share price is displayed only to three decimal places, calculation of Market Value is computed using the full share price in our data base, which may carry out beyond three decimal places

TRAK - PERSONALIZED INVESTMENT ADVISORY SERVICE

"Total Purchases vs. Market Value" is provided to assist you in comparing your "Total Purchases," excluding reinvested distributions, with the current value of the mutual fund positions in your account

prior to addition of this information on statements; securities transfers; timing of recent distributions; and certain adjustments made in your account. "Cumulative Cash Distributions" when shown, may reflect distributions on shares no longer held in the account. It may not reflect all distributions received in cash; due to but not limited to: investments made

"Net Value Increase/ (Decrease)" reflects the difference between your total purchases, and the sum of the current value of the fund's shares, and cash distributions shown. This calculation is for informational purposes only and does not reflect your total unrealized gain or loss nor should it be used for tax purposes.

Certain mutual funds may not be transferable to other broker-dealers. For further information, please refer to the fund's Prospectus or contact us. Global investment Manager Analysis (GIMA) status codes (FL, AL or NL) may be shown for certain mutual funds. Refer to "GIMA Status in Investment Advisory Programs" in the June or December statement (or your first statement, if you have not yet received one in either of those months) for a description of these status codes. Current Yield is the estimated annual income (EAI) divided by the fund's net asset value at the end of the statement period. Distributions may consist of income, capital gains or the returns of capital distributions. EAI is based upon information provided by an outside vendor and is not verified by us.

Although share price is displayed only to three decimal places, calculation of Market Value is computed using the full share price in our data base, which may carry out beyond three decimal placess
